PROFIL

As a self-taught software engineer driven by a passion for innovation, I specialize in full-stack development with an emphasis on responsive design and code optimization. Currently, I am involved in developing scalable interfaces and enhancing user experiences through integrated front-end and back-end solutions. I excel in dynamic environments and actively pursue opportunities to enhance my skills with emerging technologies.

TECHNICAL SKILLS

Languages and Frameworks

- Python, Django:(image processing, PDF, CV generators with AI, Helpdesk Web Application)
- PHP(Laravel): E-learning Platforme / E-Wallet /café platforms / MinTrackerAI App
- Java: Inventory management system
- HTML, CSS, JavaScript, TypeScript, TailwindCSS

Tools and platforms

- Git, GitHub, Postman, Docker, Xampp, API, REST APIs
- Figma, Photoshop
- MySQL, PLSQL, Oracle DB
